

Project Design Phase-I

Solution Architecture

Date	12 October 2022
Team ID	PNT2022TMID06735
Project Name	Early Detection of Chronic Kidney Disease Using Machine Learning
Maximum Marks	4 marks

Solution Architecture

- An Architecture diagram is a graphical representation of a set of concepts that are part of the architecture, including their principles, elements and components.
- The Diagram explains about the system software in perception of overview of the system.
- System uses the Machine learning model that is built using available datasets and various machine learning algorithm to generate desired prediction and visualization.
